

DUMETA®

High quality positioning equipment

Swing-arm cantilever storage rack

Efficient storage and handling of long materials

Gustos

Efficient storage and handling of long materials such as profiles, pipes, tubes, solid bars and more. Each individual layer can be separately extended and enables easy loading and unloading from the top, for example by using an overhead crane.

Using a forklift is no longer necessary, creating a safer and more ergonomic working environment. Moreover, the storage system saves a great deal of space, which leads to a significant reduction in storage costs.

DUMETA® delivers 36 models with capacities of up to 3.000kg per layer.

Features

- Individual swing arms provide easy access to each extended layer
- 36 different standard models
- Suitable for 3 m or 6 m material, it is even possible to store materials with a length of up to 24 m
- Storage capacity per layer 750 kg, 1.000 kg, 2.000 kg or 3.000 kg
- Large storage capacity per m² of floor area
- Safe and ergonomic
- Perfect overview of stored material

Optional

- Storage trays for storage of short pieces or flexible materials
- Different dividers
- Levelling feet for floor irregularities
- Telescopic arm for a lighter movement of heavy layers (max. loading)

D-7-3000-D
